

eBarangay System

HIGHLIGHTS

Keeping Barangay records is a one way to easily track resident's information. eBarangay System is capable in recording this bulk information and can be stored in a long period of time. This system can meet strategic objectives for reducing paper consumption and reducing time consuming file retrieval from bulky documents. eBarangay System can track residents record such as personal to family information, complaints to amicable settlement information (Barangay Justice System) and can create daily reports for the Barangay.

SECURITY & MONITORING

eBarangay System also help Barangay Information to be secured with the use of auto-backup database and system user level security preventing unauthorized personnel to access the information.

The ability of eBarangay System to monitor Residents Information, Business information and Property Information status is an essential feature that may help Barangay Officials in Decision making to formulate solutions, corresponding recommendations and appropriate positive actions.
